

Accelerate Greece 2026 Sponsorship Package

Accelerate Greece is a week-long program that began in California in 2019 and is now hosted in Toronto, Canada. The program's purpose is to drive innovation in Greece by supporting entrepreneurs building the next wave of successful Greek tech companies through an intensive acceleration program. This program includes immersive workshops, training, breakout sessions, mentorship, networking, and introductions to potential investors and our 20+ partners and mentors.

This year, Accelerate Greece will partner with Elevate Festival to offer 3 Scale-ups exclusive access to Elevate Festival. This includes training on pitch improvement, pricing, legal considerations and intellectual property, global scaling, financial management with a North-American lens, immersive workshops, seminars, mentorship, and networking opportunities.

All sponsors will be recognized across event communications, featured in event marketing materials, and have their logo and link displayed on the THI Canada website.
